# Test Page

Ignore this, just a page for testing.

I don't ignore pages ðŸ˜Š

Just another testing line...

This will break this page:

For Tiki 7

- 28 may - jb here testing saving ajax errors
- Maybe try without having done a preview...
- what else could it be? 3 saves and no error (in Firefox 4.0.1)
- trying the click on save directly thing... seemed fine
- maybe if you edit for ages?
  - I bet it only happens when you really don't want it to...
  - trying with pop-up preview...
  - Seems the auto save timer is broken ðŸ˜'
- Wonder if that magnify icon to open/close the preview pane is the right icon?
  - Probably not...
- I also wonder if there are any docs about this *new* preview thing?

Have to go out now, will try more later.

Previously on Tiki 6

- In Safari if you make a change and then click directly on the save button you sometimes get an alert about an undefined and irrelevant AJAX error.
  - Fixed (as far as i can tell)
