## fancy "new features in 1.10" doc page?

Posted by [Xavier de Pedro](#) Tue 22 May, 2007 11:52 GMT-0000 posts: 57

Hi mates:

What do you think about creating a new page for each new major Tiki version, including some screenshots of those new features, etc?

Something like other free software (but more professional) tools do:

<http://www.dokeos.com/es/features.php>

We could even take some of the nice screenshots that some tiki devs. are doing...:

<http://fr.tikiwiki.org/tiki-index.php?page=cv%201.10>

or generate them from scratch, those of you who are able to do those nice shadows around screenshots, etc. (or tell the newbies like me how to do them with free software, like GIMP, Inkscape, or similar ☐)

We could even make a new and short article (at least on tw.o, and maybe also here at doc.tw.o) each month shortly explaining a feature (or a new feature in 1.10).

Opinions?

People interested in helping to do that?

(I like the idea, and I could help doing that short article each month).
