Guys Hi I am Fivos from Greece, I have translate the Wiki Manual in Greek and I want to ask you how I can add it in this page.

My second question is how to create a documentation in greek.

Thank you

Hi Fivos!

This is amazing!

Please create new wiki pages and add your content

Just use the English page name, and add ,el

For example: Documentation,el

After, you save the page, click on translation to associate to the proper page.

Thanks!

M

PS It looks like you have already figured it out!

It looks like xavi is helping you.

Please make sure not to overwrite the English version. You must create a new page and then, associate it with the translation set.

Thanks!

M

Yep, I'm (attempting to) help him. However, I've temporarily disallowed access to editing any more wiki pages, since you keep editing the wrong pages, fivos.

Please, read the email message I sent you yesterday, and the comments Marc and me left to you in this forum and on the comments of pages (see [this other thread](#)).

Once you think you understand it, please explain here in this forums the steps you plant do (with your own words) to avoid the mistake it has been happening to you the last days. Then we'll remove the banning and you'll be able to keep editing your Greek documentation (that what we all want!

And welcome to Tikiwiki community, fivos!

I hope to hear from you soon, in order to let you keep editing wiki pages here at doc.tw.o

Cheers,

Xavi
