Re: Site Identity

Posted by BillMac Thu 06 Sep, 2007 20:28 GMT-0000 posts: 9 🚫

I am using TW 1.9.7. I may have exceeded the 250 character limit on the Site Identity creation screen. Now, when I log in with admin authority, the pages only load to the line div id="sitehead" resulting in a blank screen. When logged in as a regular user or as anonymous, I get full pages.

I cannot manage the site at this point. Help would be greatly appreciated.
