## Enabled tikisheets here on doc.tw.o

 Posted by [Xavier de Pedro](#) Sun 16 Dec, 2007 17:24 GMT-0000 posts: 57 ☆ ☆ ☆ ☆ ☆ 

Hi:

I've enabled the [Spreadsheet](#) feature here in doc.tw.o for anonymous (to view) and to registered to edit sheets. Since importing from other spreadsheets to tiki spreadsheet through .csv files is only granted to users with "admin sheets" perm, I've also granted the global perm admin sheets to registered.

Whenever we update to 1.10, where perms per sheet are available, we may change this setting for local sheets , if needed....

Well, this way we allow to people to dogfood spreadsheet to make better kind-of-wysiwyg tables in some cases...
