name  
Lucene maximum number of merge documents

help

default  
0

description  
Largest number of documents merged by addDocument(). Small values (for example, less than 10,000) are best for interactive indexing, as this limits the length of pauses while indexing to a few seconds. Larger values are best for batched indexing and speedier searches.

hint  
Small values (for example, less than 10,000) are best for interactive indexing. Use 0 for the Lucene default, which is practically infinite.
