Modules

Description
Boxes for content, typically on the left or right of a portal-style site but can be placed anywhere, even in page content, with or without a visual frame. Very useful for navigation and content re-use. Over 100 built-in modules are available, and site admins can create their own.

PluginModule is a plugin that allows modules to be included in Wiki pages.

The user modules section lets the users hide or show available modules of a Tiki site and configure their positions.
