Intertiki

Status
  Open
Name
  Intertiki
Feature name and link
  Intertiki
Description
  Authenticate users and grant them appropriate permissions at a "slave" Tiki site based on user data from an external "master" Tiki site. (This is used at the Tiki project sites, for example.)

Works with global category system
Notes
UI end user: A->C: there is no information on tiki-login_scr.php or similar when intertiki is activated, and users can login with @domain info in their usernames. Plus sometimes, it doesn't show modules for users logged as intertiki users (as it happened in edu.tw.o)
